August 25, 2011

Rogue Valley Sewer Services (RVS) is committed to providing reliable and affordable sanitary sewer service to all of our customers. As part of this commitment, we have established a Regional Preferred Pumper Program for those companies that properly pump, haul, and dispose of hydromechanical grease interceptor (HGI)/gravity grease interceptor (GGI) waste.

As approved registered participants in the Preferred Pumper Program, pumpers will agree both initially and continually that they will meet the Preferred Pumper criteria as outlined by RVS. Participants that fail to meet the Preferred Pumper criteria and program standards may be removed from the program.

Approved participants will be added to the Preferred Pumper List which will be posted on our website and available upon request at the RVS office. There are over 250 food service establishments (FSE's) in the RVS service area and all will be notified of our Preferred Pumper Program and advised of the Pumper List. The RVS Preferred Pumper Program is strictly voluntary and not a requirement to service HGI/GGI's in the RVS service area.

To apply, please visit our website at www.rvss.us click on the "FOG" link, and fill out the registration form. Please remember that admittance into the program is subject to approval by RVS District Engineer.
